## **Installation Guide for Lightroom Presets, Photoshop LUTs & Actions**

**Thank you** for purchasing our digital products.

### **Adobe Lightroom Presets**

1. Download and unzip the package.
2. Open Lightroom Classic or Lightroom Desktop.
3. Go to Develop > Presets panel.
4. Click the + icon > Import Presets and select the .xmp files.
5. Apply a preset and adjust exposure/white balance as needed.

### **Adobe Photoshop LUTs (.cube)**

1. Open your image.
2. Add an Adjustment Layer > Color Lookup.
3. Choose Load 3D LUT and select the .cube file.
4. Fine-tune opacity or blend mode if desired.

### **Adobe Photoshop Actions (.atn)**

1. Open Window > Actions.
2. Click the menu icon > Load Actions.
3. Select the .atn file.
4. Open a compatible image and press Play.

### **Troubleshooting**

- Restart Adobe apps after importing if items don't appear.
- Ensure files remain unzipped before importing individual assets.
- Update Adobe software to the latest version.

### **Support**

If you need help, contact CT Photography with your order details and screenshots of any error.
